## QUALITY

Broadly speaking, the history of Duravit AG can be divided into two sections. In the early phase up to 1980 we concentrated on the quality of our ceramics and our region. It wasn't until the 1950s that the prevailing economic conditions permitted sanitaryware to become part of the global flow of goods. The first great innovation was the Duravit wall-mounted toilet in the 1960s. At that time functional aspects predominated in the bathroom. In the 1970s decoration, shapes and colours came into play.

## DESIGN

In the 1980s the topic of design as we understand it today became part of the bathroom, and that was also the start of our success story. Then and now we have been a key influence on that process. The first projects with Dieter Sieger set standards – and in hindsight they transformed the entire sector. But our products are more than that. They are timeless classics – and remain so today. 1994 saw the big breakthrough with Philippe Starck. Presentation, approach and product design were completely new at the time. Modern classics and the DNA of Duravit were born.

## TECHNOLOGY

These factors remain relevant in 2012, 2015 and 2017. A pared-down design language, plenty of light, colour that emanates from the material. Plus, and this is new: technology, which does not dominate the design, but stays in the background. It is sustainable and enhances comfort. It has a use and a benefit. In a nutshell: Duravit represents a unique design language that we invented along with our partners and that defines us.

# Life is an adventure. Ours started in 1817.

## 200 Years Of “Living Bathrooms”

In 2017, Duravit celebrated its 200 year anniversary. 200 years in which we made quality, design and technology our core competences. In the meantime, we accomplished to be manufacturers of designer bathrooms and can address the entire interior of the “bathroom”. That is unique in our sector. Find out how all of this did come about and which milestones we set over the time.

## Duravit Over The Years

**1817**

Georg Friedrich Horn receives the permission to run a ceramic factory in Hornberg.

**1950**

Definite transition to the production of sanitary porcelain.

**FRANKE**

**2020**

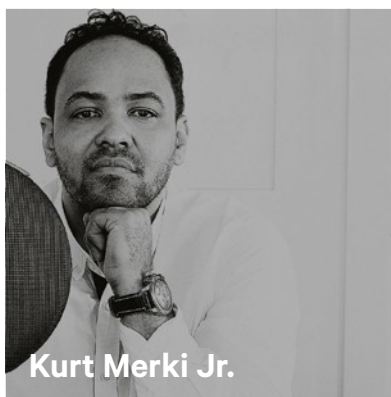

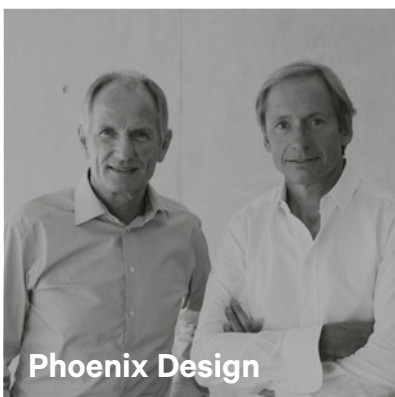

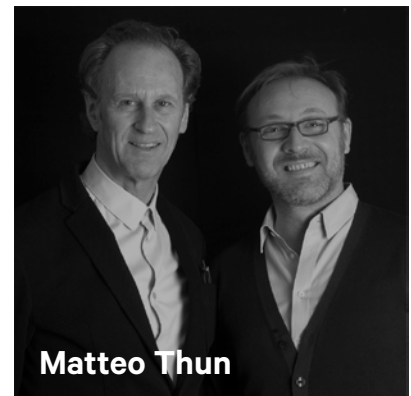

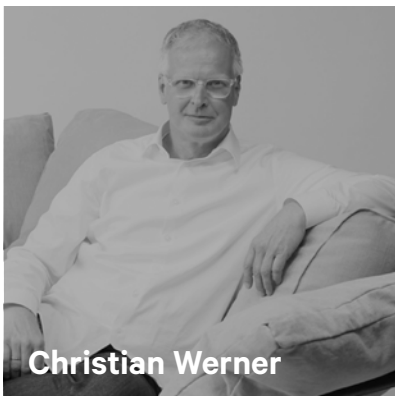

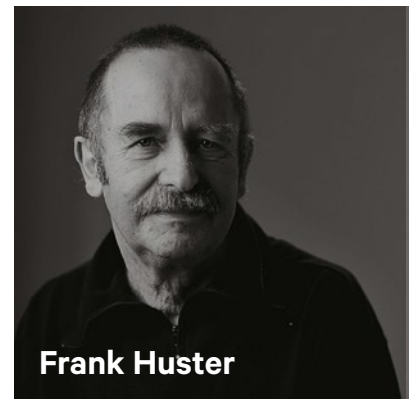

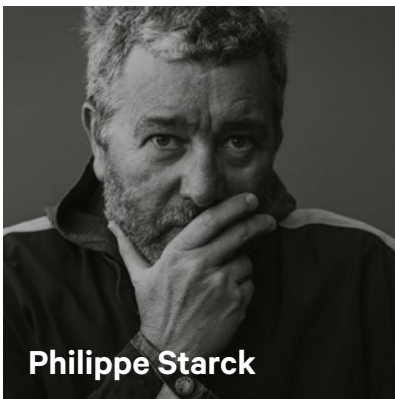

Franke Australia Pty Ltd take over distribution of Duravit in Australia.

# The Visionary Designers of Duravit

Duravit champions a precisely formulated, recognisable and sustainable design idiom which is applied uniformly in all the market regions in which the company operates. At the root of this idiom is the palpable embodiment of the design in elementary, archetypal forms. The design idiom is of such importance to Duravit that it is fundamental to the essence of the company's brand, along with the highest standards of product quality and comfort-enhancing technology.

The unique network of 17 internationally successful designers, architects and their teams continues to develop the Duravit design concept. To date, their collaboration has given rise to 83 product lines and bathroom ranges which have won Duravit well over 160 design prizes and awards.

**VIEW MORE  
ON OUR VISIONARY  
DESIGNERS**

# Duravit AG aspires to be a climate-neutral business by 2045

As a company with deep regional roots that has also become a global player, Duravit feels a special sense of obligation to the concept of sustainability.

- Milestone: 20 percent reduction in CO2 by 2030 compared to 2019
- Stephan Tahy, Duravit CEO: “We are in the process of questioning old certainties and investing in finding and implementing new ways of achieving a sustainable future”

## SensoWash®

Naturally clean and fresh. Nothing is as thorough, as hygienic, as natural and as refreshing as cleansing with water. This is why the shower-toilet – a toilet-bidet combination – is becoming increasingly popular. Considerably softer and gentler than toilet paper, water also provides freshness. The shower-toilet leaves users feeling clean and refreshed. Duravit's latest contribution to the topic is SensoWash®: an innovative range of high-quality shower-toilets that meets every requirement for the contemporary bathroom – hygienic cleanliness, high operating comfort and sustainable design.

**Duravit WC technology for  
improved cleanliness and hygiene.**

Duravit  
Rimless®

**Duravit Rimless®** features impressive performance, efficiency and hygiene. The open design of the toilet rim enables a new type of flushing action: resulting in a dynamic and powerful flow of water that rinses the entire inner surface of the bowl. This ensures perfect and hygienic flushing results.

HygieneGlaze

**HygieneGlaze 2.0** The durable glaze baked into the ceramic is not only especially effective, but also acts very quickly. After just six hours, 90% of bacteria are killed and after 24 hours 99.999 % have been eliminated, an unprecedented level. Not available in combination with WonderGliss.
